

How to Use "For The Boards"

This is not a textbook, but a high-yield scaffold of the "must-know" material. It is an active study tool used in conjunction with a question bank.

The goal is to create a single, personalized resource for your final review.

Recommended Study Method:

- 1. Work Through Your Qbank:** Complete questions as you normally would.
- 2. Annotate:** After reviewing the explanation, find the corresponding topic in this guide. Write in any key details, mnemonics, or personal reminders you learned from the questions.
- 3. Consolidate:** By adding your own notes, you transform this book into your primary, all-in-one study resource ... For The Boards.

Please report any errors or improvements on our website, ForTheBoards.com.

Good luck!
